
03b Networks Corporate overview

03b will transform communications by deploying a ground breaking, next-generation satellite constellation that will be capable of offering our customers connectivity which is better, faster and more affordable.

This global satellite constellation has the flexibility to meet the capacity and network demands of Satellite Service Providers, Government Entities, Mobile/Wireless Network Operators, Enterprise service providers, Telcos and ISPs in the emerging markets of the world.

03b will deliver the highest combination of bandwidth, speed, low latency, coverage and availability – with a commitment to quality that customers can rely on and at a price accessible to everyone.

03b's next-generation satellite network will reach customers, businesses and other organizations in 177 countries across Asia, Africa, Latin America and the Middle East.

At 03b our people are our biggest asset. We have the highest caliber of space and ground engineers, technical and commercial experts and a world class sales team with a passion, dedication and raw determination to make 03b a success and provide the internet to millions of people around the world who currently don't have access.

03b Networks

Corporate overview

03b's unique network of Medium Earth Orbit (MEO) satellites offer low latency, with round trip data transmission taking no more than 150 milliseconds. Using our network, our customers can offer a variety of applications to a wide range of business, consumers, government agencies and public organizations.

IP trunking

03b's IP Trunking product suite, *03bTrunk* delivers global connections at unmatched speed, quality and cost. The range of *03bTrunk* products connects your carrier network to the internet, allowing you to transmit and receive data at unparalleled speed, quality and low cost. Optimized with a variety of network solutions, our scalable bandwidth can increase your capacity to grow and provide a flexible cost effective solution you can tailor to your budget which is supported by various Service Level Agreements that suit your needs.

Mobile/Wireless backhaul

03b provides full country coverage for mobile and wireless backhaul in 177 countries where wireless technology is the only option. Furthermore, with link capacities scaling from 1Mbps to 10Gbps, the system offers an unprecedented solution for aggregating and backhauling traffic in both urban and remote areas.

Fiber resiliency

Operators seeking to strengthen their offer to use 03b's carrier class complement as an 'insurance policy' for peace of mind. In the event of a fiber cut or the maintenance of a terrestrial connection, a seamless switch over to an 03b connection could save hours or days of operational problems and restore customer trust.

On demand capacity

In emergency situations or during military operations, satellite connectivity provides essential links between personnel when terrestrial infrastructure is damaged or doesn't exist. 03b's steerable spot beams can be positioned when and where they are needed at short notice to provide government agencies with the vital communications links they require.
